You can find the step by step guide to processing applications from the form [here](#).

# TIPS FOR IMPLEMENTATION

- Consider creating a specific car loan application page to house the iframe and linking to this rather than putting it in the middle of an existing which would then require scrolling.
- The best way to do this, would be to have your, finance offering information with a button which then clicks through to the application form.
- This allows you to have a dedicated application form page and means you can add things such as phone numbers or contact details around the form

# TIPS & RECOMMENDATIONS

- The form can be used on a tablet device to allow customers to complete their finance application while waiting for the business manager.
- Highlight the convenience of completing the form before coming into the dealership. Their application could be processed and waiting with less waiting time.
- Consider sign posting your website to direct customers to the application form. This can be in the form of an “Apply for finance on this vehicle” button on each vehicle information page.
- Consider the customer’s user journey and include a button or link to the application form at points across the website where they may be considering applying for finance, such as after the calculator, on product pages and on the finance page
- Add a link to the application form to website navigation and link from other pages which mention finance
